

HiCap DR

Compact power.

Product EANs: xxxxxxxxxx

It may be small, but the HiCap's talent for maximising your system's musicality should not be underestimated. A compact power supply partner for almost all of our preamplifiers plus our phono stages and active crossover components, its large toroidal transformer and generous, high-quality smoothing capacitors ensure excellent performance and value. NAC 282 preamplifier owners can enjoy even better performance by adding an additional, second HiCap to their system.

Key Features

- Two 24V power outputs
- All-new Discrete Regulator (DR) configuration, delivering Naim Audio's best-ever standards of stable, low-noise power
- Bead-blasted, black-anodised aluminium chassis plus anti-vibration, resonance controlling feet

Reviews and Awards

Integrated Amplifiers

'Despite a history that goes back ten years, the SuperLine is still the company's best phono stage...'

April 2018

'the pairing of SUPERNAIT and HiCap was a pleasure to audition'

Dec 2009
