

UNIVERSAL WIRELESS RECEIVER - APTX

Specification sheet

The Universal Wireless Receiver enables wireless connection of all your Bluetooth-compatible devices to your amplifier or multimedia system. More freedom for your mobile devices without impairing audio reproduction quality. The apt-X codec achieves a 4:1 compression ratio, allowing for near-CD quality listening.

Key points

- Wireless transmission with near-CD quality
- Compatible with all smartphones and tablet PCs equipped with Bluetooth technology
- No dongle required for the mobile device
- Easy to install and use
- Audio-visual use: low latency
- Range of approximately 10 meters without obstacles
- RCA extension cable supplied – compatible with all amplifiers equipped with stereo RCA input.

	Universal Wireless Receiver
Range	10m (line of sight)
Codec	aptX
Compression Ratio	4:1
Resolution and Sampling Rate	16 bits - 44,1kHz
Frequency response	10Hz to 22kHz
Algorithmic Delay	<1,89ms @ Fs 48KHz
Maximum emission power	3.74dBm/2.37mW
Frequency Range	2402 MHz to 2480 MHz
Dimensions	60x56x14mm
Weight	0.044lb (22g)
