

## FOCAL UNVEILS SECOND-GENERATION SLATEFIBER, ITS NEW RANGE OF CAR AUDIO KITS

Focal presents the new Slatefiber range, comprising six models that together form a complete in-car audio solution. Made in France, the Slatefiber cone is a Focal innovation already acclaimed in home hi-fi and professional audio. With this expanded offering, following the first Slatefiber edition released in 2022, Focal strengthens its leadership in audio by making precise, dynamic and emotionally engaging sound accessible to even more listeners.

### SLATEFIBER: AN EXCLUSIVE TECHNOLOGY

At the heart of this range lies the Slatefiber cone, a proven Focal technology designed not only for in-car listening but also for home audio and professional environments.

- A composite material developed and manufactured by Focal in its French workshops.
- Non-woven recycled carbon fibres combined with a polymer, delivering rigidity, lightness and damping — the three essential properties required for high-precision sound reproduction.
- Detailed, energetic and neutral sound, transforming every journey into a vivid listening experience.

### A COMPLETE SOLUTION

The Slatefiber line brings together **six complementary models**: a coaxial kit, two component 2-way kits, a 3-way component kit, a pair of full-range midrange drivers and a subwoofer.

- A range designed to guarantee acoustic consistency across all models.
- With optimised sensitivity, the loudspeakers deliver impressive dynamics, with or without amplification, making audio upgrades accessible to a wide audience. Whether improving an existing installation or building a complete system, Focal offers a true end-to-end solution.

### RENEWED DESIGN, LONG-LASTING PERFORMANCE

These kits also stand out for their refined design. The aluminium basket adopts a distinctive “rotor” design, combining aesthetics with rigidity. The cone, identifiable by its slate-like appearance, provides a unique visual signature while reflecting the excellence of French manufacturing.

Every component is selected to ensure high power handling and stable performance over time. The inverted aluminium/magnesium dome tweeter — a hallmark Focal technology — offers multiple mounting options and level adjustment to integrate seamlessly into any vehicle interior. These technical and design choices reinforce the durability of the range.

### OPTIMISED INSTALLATION

The Slatefiber range has been engineered to simplify installation: mounting accessories, separable crossovers and more. These solutions allow for quick, clean integration.

**Product availability:** march 2026

#### ABOUT FOCAL

A global leader in audio, Focal is a French brand renowned for its acoustic excellence, founded in 1979 in Saint-Étienne. Recognised as a Living Heritage Company and a member of the Comité Colbert, its creations are designed and manufactured in its workshops, where craftsmanship, innovation and cutting-edge technology come together. Loudspeakers and speaker drivers lie at the heart of its expertise, which also extends to headphones, in-car systems, and studio monitors for audio professionals. United within the Vervent Audio Holding, Focal and Naim – a benchmark in British electronics – together offer an unrivalled sound experience, embodied in the global network of Focal powered by Naim stores.
