

# FOCAL<sup>®</sup> INSIDE

## BMW BMW I3

### ACTIVE 7.0

This solution allows you to replace the front and rear speakers of your vehicle, but also to add a central channel and a dedicated amplifier. The amplifier increases the power of the audio system, providing clearer and more dynamic sound reproduction while maintaining optimal balance between the different sources.

Legal Information: • These Focal Inside products are designed for specific vehicles: BMW 3 Series G20, BMW 4 Series F32, BMW I4. • They are not incompatible with other vehicles from the same manufacturer or automotive group. • However, Focal cannot guarantee full compatibility with these vehicles: adjustments may be necessary. • It is essential to verify the compatibility of our speaker kits with your vehicle's audio system before any purchase or installation. • Focal cannot be held responsible for any incompatibility or damage resulting from incorrect installation.

Brand Information: Check if your center channel location has a power source when adding a BMW ICC 100.

Our Impulse 4.320 amplification solution can only be added to vehicles with a standard audio system, without an amplifier, or without a professional GPS (large screen). When replacing the original subwoofer, depending on the car's audio system, please select the BMW ISUB with a suitable impedance (2 / 4 / 8).

Below are the compatibilities to check according to your car's audio system and its impedance: • BMW Standard Audio: ISUB BMW 4 - ISUB BMW 2 • BMW Top HiFi: ISUB BMW 4 - ISUB BMW 2 • BMW Harman / Kardon: ISUB BMW 8 - ISUB BMW 2
